- 2 fully independent monitoring channels
- A push-to-talk button for the microphone audio with an "active" state indicator
- Color LCD touch screen display for playback control
- Noise cancelling microphone and low-noise audio circuits
- Easy to use ComLog Negotiator recording software

OVERVIEW

> **Digital Voice Recording and Playback** - The ComLog Negotiator is a portable voice recording system designed to record multiple audio inputs onto a single or multi-server system for audio storage and playback. Playback of recordings can be instantly retrieved using the simple LCD touch screen.

> **Based on reliable and proven digital recording technology** - The unit is based on the recording technology of the ComLog Digital Voice Recorder to provide instant and simple recording for a cellular telephone, wired "land line", as well as external audio connections.

> **Discrete & Portable Housing** - The ComLog Negotiator is housed in a compact, rugged, discrete suitcase. It is light weight, portable and is able to endure any abuse normally encountered in the field of application. Its military rated components allows for its operation in extreme weather conditions and enhances reliability.

APPLICATIONS

> **Hostage Negotiations** - The ComLog Negotiator provides a mission critical recording solution to hostage negotiators who demand easy to use, performant and reliable recording and playback equipment. It permits several hostage negotiator officers to record live negotiation conversations and simultaneously listen to pre-recorded audio or other audio sources.

SIMPLE AUDIO MIXER CONSOLE

The ComLog Negotiator mixer console has various adjustable audio controls and audio interfaces.

> **The Primary negotiator's channel** is used by the negotiating officer to communicate with a remote party. The negotiator officer's headset consists of stereo headphones with an integrated noise cancelling microphone.

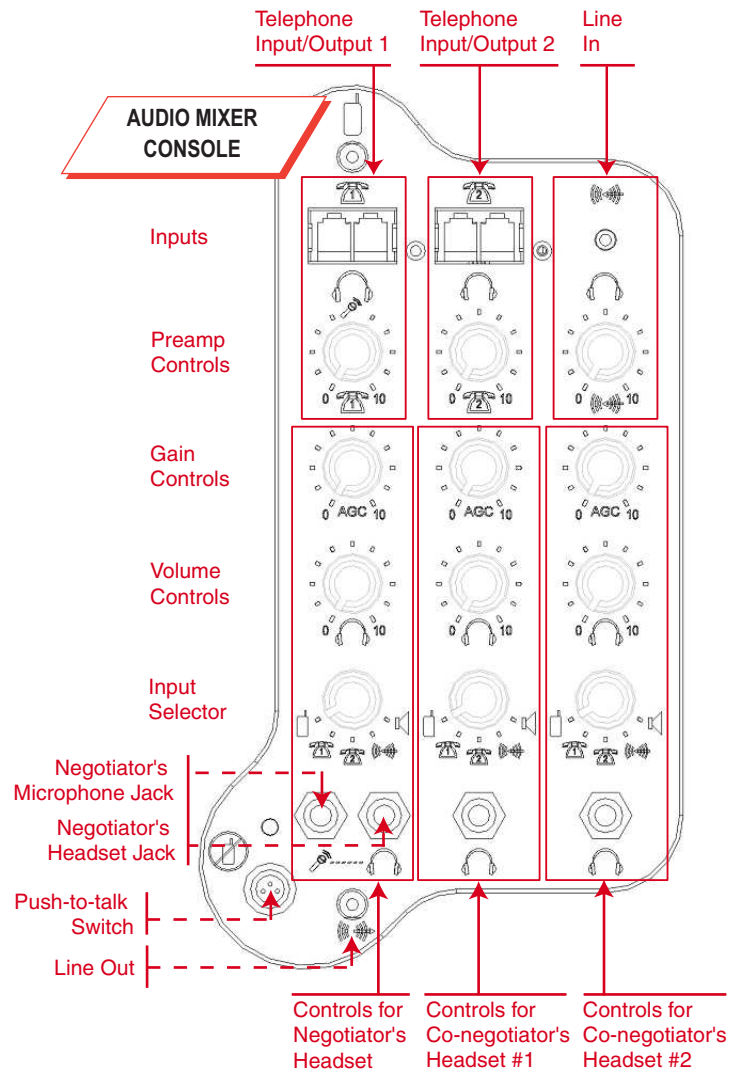

> **Two secondary audio monitoring channels** are used for monitoring by co-negotiators via stereo headphones with 1/4" jacks.

> **Multiple channel parameter controls** include channel preamp, channel gain, volume, and input selection.

> **Multiple channel selection control** lets the monitoring officers select from various audio inputs such as the live conversation, playback of recorded audio, and other audio inputs by using a channel select switch.

SIMPLE GUI

The ComLog Negotiator has a simple and easy to use GUI. It is operated with a minimum number of large buttons and is free of cluttered display options.
